Push amendments into a git repository

Methinks great idea!

writing law

=?

writing code

# Writing code

- Text
- Collaborative, Distributed, Parallel
- Workflow, Review, Discuss, Proof-read
- (Automated) Testing ?
- LOTS of tools to work fast (editor, version control, scripting, etc)

# Law is Code Rebooted

1. Use existing tools for code review
2. Convert from git to hg
3. Import into cubicweb-vcreview
4. Scratch head...

# What can I do?

1. comment amendments
2. query (datamining?)
3. export (csv, ods, json, etc.)
4. reports, dataviz?

# Interested ? Get in touch!
